World-class AI research in Prague:

Artificial Intelligence Center, Department of Computer Science, CTU in Prague

Ph.D. Positions

Artificial Intelligence Center, Department of Computer Science opens a competitive call for applications for a research fellow contract in the context of a recently awarded national center of excellence: Research Center for Informatics (RCI).

AIC contributes RCI in foundational research in artificial intelligence, multiagent systems, game theory, automated planning, computational robotics with applications to cybersecurity, next-generation transportation systems or intelligent manufacturing. Besides RCI, we work on many R&D projects answering fundamental theoretical questions, designing state-of-art AI algorithms and implementing cutting-edge practical AI systems. AIC is also focused on AI applications, as a result of which several successful startups have been incubated from within AIC.

Funding:

The position is fully funded. Besides waving/covering the tuition fees, the stipend + salary for a starting PhD student is above the average salary in Prague, offering comfortable living in one of the most vibrant and cosmopolitan capitals in EU.

Location:

Downtown Prague, Czech Republic

Team:

We are young and quickly growing research center at the oldest technical university in the region. We strive to reach artificial intelligence research result that are extraordinary thanks to their revolutionary nature, size, relevance and benefit to science and society.

We are looking for a new PhD student for our team, led by best researchers and academics. If you might be interested, contact us at <u>katarina.takusova@agents.fel.cvut.cz</u>

The application should include:

· Structured Curriculum Vitae.

Motivation letter
